

Awesome CV LaTeX template for your outstanding job application

What is Awesome CV?

Awesome CV is LaTeX template for a **CV(Curriculum Vitae)**, **Résumé** or **Cover Letter** inspired by [Fancy CV](#). It is easy to customize your own template, especially since it is really written by a clean, semantic markup.

Quick Start

- [Edit Résumé on OverLeaf.com](#)
- [Edit Cover Letter on OverLeaf.com](#)

Note: Above services do not guarantee up-to-date source code of Awesome CV

How to Use

Requirements

A full TeX distribution is assumed. [Various distributions for different operating systems \(Windows, Mac, *nix\) are available](#) but TeX Live is recommended. You can [install TeX from upstream](#) (recommended; most up-to-date) or use `sudo apt-get install texlive-full` if you really want that. (It's generally a few years behind.)

If you don't want to install the dependencies on your system, this can also be obtained via [Docker](#).

Usage

At a command prompt, run

```
$ xelatex {your-cv}.tex
```

Or using docker:

```
$ docker run --rm --user $(id -u):$(id -g) -i -w "/doc" -v "$PWD":/doc thomasweise/t
```

In either case, this should result in the creation of `{your-cv}.pdf`

Credit

LaTeX is a fantastic typesetting program that a lot of people use these days, especially the math and computer science people in academia.

LaTeX FontAwesome is bindings for FontAwesome icons to be used in XeLaTeX.

Roboto is the default font on Android and ChromeOS, and the recommended font for Google's visual language, Material Design.

Source Sans Pro is a set of OpenType fonts that have been designed to work well in user interface (UI) environments.

Contact

You are free to take my `.tex` file and modify it to create your own resume. Please don't use my resume for anything else without my permission, though!

If you have any questions, feel free to join me at [#posquit0](#) on [Freenode](#) and ask away. Click [here](#) to connect.

Good luck!
